SUMMARY

Results-driven Master of Computer Information *Science* graduate with hands-on experience in WordPress development, web technologies, and data management. Skilled in React.js, PHP, and databases, with experience building responsive applications and optimizing website performance. Proven ability to deliver real-world projects and system solutions. Seeking to contribute technical and problem-solving skills to a dynamic, growth-focused organization.

SKILLS

Proficient in frontend and mobile technologies (React Native, React.js, HTML, CSS, Bootstrap), programming (JavaScript, C, C++), backend development (PHP, WordPress, REST APIs), with strong experience in databases (MySQL, MongoDB) and tools including VS Code, MS Excel, and PowerPoint.

PROFESSIONAL EXPERIENCE

Full Stack Developer (PHP & WordPress) — Coderian Technology, Baroda Dec 2021 - Aug 2023

- Developed and maintained full-stack web applications using PHP, WordPress, HTML, CSS, JavaScript, and MySQL, covering end-to-end development from requirement analysis to deployment.
- Designed and customized WordPress themes, plugins, and responsive UI, integrated REST APIs, and optimized performance and database queries, improving efficiency and load speed by ~25%.

Computer Operator — Karibu Pharmaceutical, Zambia: Aug 2019 – Aug 2021

- Managed and maintained operational data systems, ensuring high accuracy and data integrity.
- Processed and organized large datasets, improving reporting efficiency by 20%.
- Supported daily IT and system operations, ensuring smooth workflow across departments.

WordPress Developer — Coderian Technology, Baroda: Jan 2019 - July 2019

- Developed and maintained 4+ WordPress websites, improving performance, responsiveness, and user experience.
- Customized themes and plugins based on client requirements, enhancing website functionality and usability.
- Optimized website speed and SEO performance, reducing page load time by 25%.
- Implemented mobile-responsive designs, increasing accessibility across devices.

Data Analyst — The TactTree, Baroda: Jan 2018 – Jun 2018.

- Analyzed, cleaned, and managed large datasets using Microsoft Excel (PivotTables, VLOOKUP, data validation), ensuring data accuracy, consistency, and actionable insights.
- Developed Excel dashboards and automated reports, improving decision-making and reducing manual effort by 25%.

WordPress Intern — Inchmark, Baroda: Oct 2017 – Dec 2017

- Assisted in building and customizing WordPress websites for multiple client projects, contributing to UI/UX improvements and new feature implementation.
- Identified and fixed bugs in collaboration with developers, improving site stability and reducing downtime.

PROJECTS

Online Exam Web Application:

- Developed a web-based exam system using HTML, CSS, JavaScript, and PHP
- Designed secure login and result processing features for improved user experience

Online Sound System Project:

- Built a web platform for managing and booking sound systems.
- Implemented backend functionality and database integration using MySQL

Bakeland Project:

- Built a responsive WordPress website for a bakery, customizing themes and improving UI for better engagement.
